An engineered solution to climate change –
Direct Air Capture (DAC)

Speaker:

Mr. Grant Connors,

MIEAust CPEng NER, P.Eng

Team Lead, Electrical @ BBA

Abstract

The presentation will cover the current science on climate change, the policy that has evolved around climate change, a review of the potential solutions to climate change, a review of the Direct Air Capture (DAC) solution, how this technology can be used and some of the lessons learned while designing a large DAC plant.

Biography

Mr. Grant Connors is a Chartered Professional Engineer registered in Australia (CPEng) and British Columbia (P.Eng.), Canada, he holds 20 years of experience in electrical power transmission, distribution, mining and materials handling. He is also a Project Management Professional (PMP) with proven experience managing high profile engineering projects. He is a proven technical leader who excels when collaborating with team members, clients, contractors and government agencies.

No Registration is Required:

This event is provided **free of charge**, and welcomes all interested **members and guests**.
